## Experience

- Front-End Developer Teampulse  
March 2022 - Present time (1 year and 2 month)

I implemented the design from Figma using React and Styled Components, utilized Redux Toolkit and useContext for state management, actively used hooks and created custom ones, used libraries for form management and validation, and collaborated closely with the backend team.

- Front-End Developer WEB STUDIO  
October 2021 - February 2022 ( 5 month)

Created landing page and flexible CRM system for e-shops using React and Sass, including form processing, user authentication and customer management, inventory tracking and sales reporting.
