- ReactHook Form, Formik, Yup, JEST, RestApi
- HTML, CSS, SASS, StyledComponent, TailwindCSS, Material UI, Module css, Adaptive layout
- ReactNative, Vite, ESLint, Prettier, Chart.JS, Figma, BEM

Work Experience

Teampulse

February 2022 - Present time (1 year and 2 month)

Front-End developer

- Developed web designs with Figma and implemented using React and Styled Components with responsive design for various screen sizes.
- Implemented complex functionality using React hooks, custom hooks, and Redux Toolkit. Improved user experience by enhancing logic and functionality for form handling.
- Extracted server-side data and presented it to users, including chart display with Chart.js. Implemented error handling for seamless application operation.

WEB STUDIO

October 2021 - February 2022 (5 month)

Front-End developer

- Developed a CRM system for electronic stores, including a landing page with responsive design built with React and Sass. Implemented form processing, user authentication, and a demo version of the system. Also completed features such as customer management, inventory tracking, and sales reporting.
